

## Premier Inn (Whitbread Plc) Newcastle City Centre, Millenium Bridge

My job is to help make sure Premier Inn Millennium Bridge in Newcastle's City Centre, is as welcoming, safe, secure and relaxed as possible. Another way we have managed to do this recently is through using two way radios provided by Apex Radio Systems Ltd. Apex came highly recommended due to their extensive experience of providing communications to the UK hotel sector and their service and professionalism has been second to none. From site visits in which they fully explained the benefits of using wireless radio communication to full training and free trials, Apex made the experience of sourcing, testing and using two way radios as simple and straightforward as I could have hoped for.

At Premier Inn, we're committed to providing a warm welcome and using the radios supplied from Apex allows us to do this in an affordable and highly effective way.

For any hotel looking to improve their safety and communication, I would recommend you speak with Apex Radio Systems Ltd. as they have helped me make Premier Inn Newcastle a better place to stay.
