

Millennium Inorganic Chemicals Manufacturing Plant, Grimsby

Millennium Inorganic Chemicals in Grimsby is one of the world's largest manufacturers of chemical titanium dioxide. Their manufacturing plant provides numerous products and services for a wide variety of industries around the world.

Apex was selected to be the supplier of the two-way radio communications system Millennium Inorganic Chemicals needed to cover their wide area site.

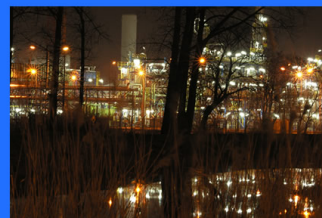

Due to the working environment in this industry the radio products supplied were to be capable of withstanding certain extraordinary conditions.

The ability to cope with long periods of exposure to chemical dust particles and extreme sturdiness was a must.

Because of this Apex advised the customer of the best radio product available to meet their specific requirements.

Due to the 24 hour a day operation at the manufacturing plant, Apex were asked to install a complete radio system consisting of a Repeater Base Station, three fixed desktop radios and ninety six handportable radio units within one day.

Apex were successful in their task and a team of four Apex engineers ensured the customer had a working radio system installed, tested and commissioned inside the allocated time period.
