Samsung Galaxy XCover 4s

The Galaxy XCover 4s is available exclusively as Galaxy Enterprise Edition

The hard-working business phone.

The Samsung Galaxy XCover 4s blends durability with desirability to create an attractive business phone which stands up to the most extreme work environments. In fact, it's so hardwearing, we only update it every three years—when the latest technology protects it even further. It's our toughest ever business phone.

IP68 water and dust resistant.¹

With IP68 water and dust resistance, the Samsung Galaxy XCover 4s is designed to withstand the most challenging environments. You can use it in dusty conditions, like a factory or building site. And if you get caught in a downpour, your phone is fully protected from the elements.

Touch sensitivity.

Work in tough conditions without interruptions with the superior touch sensitivity of the Samsung Galaxy XCover 4s. If you work outside, or wear gloves to protect your hands, there's no need to remove them thanks to Glove Mode—just carry on working as usual. And if your hands are slippery or wet, Wet Mode means the Samsung Galaxy XCover 4s screen still reacts to your touch, as you navigate through apps or send messages.

Samsung Knox.

The Samsung Galaxy XCover 4s is protected by Samsung Knox, our defence-grade security platform built from the chip up. No matter where you and your team go or what you do, you can be sure your business' data stays secure with superior protection that's easy to manage.

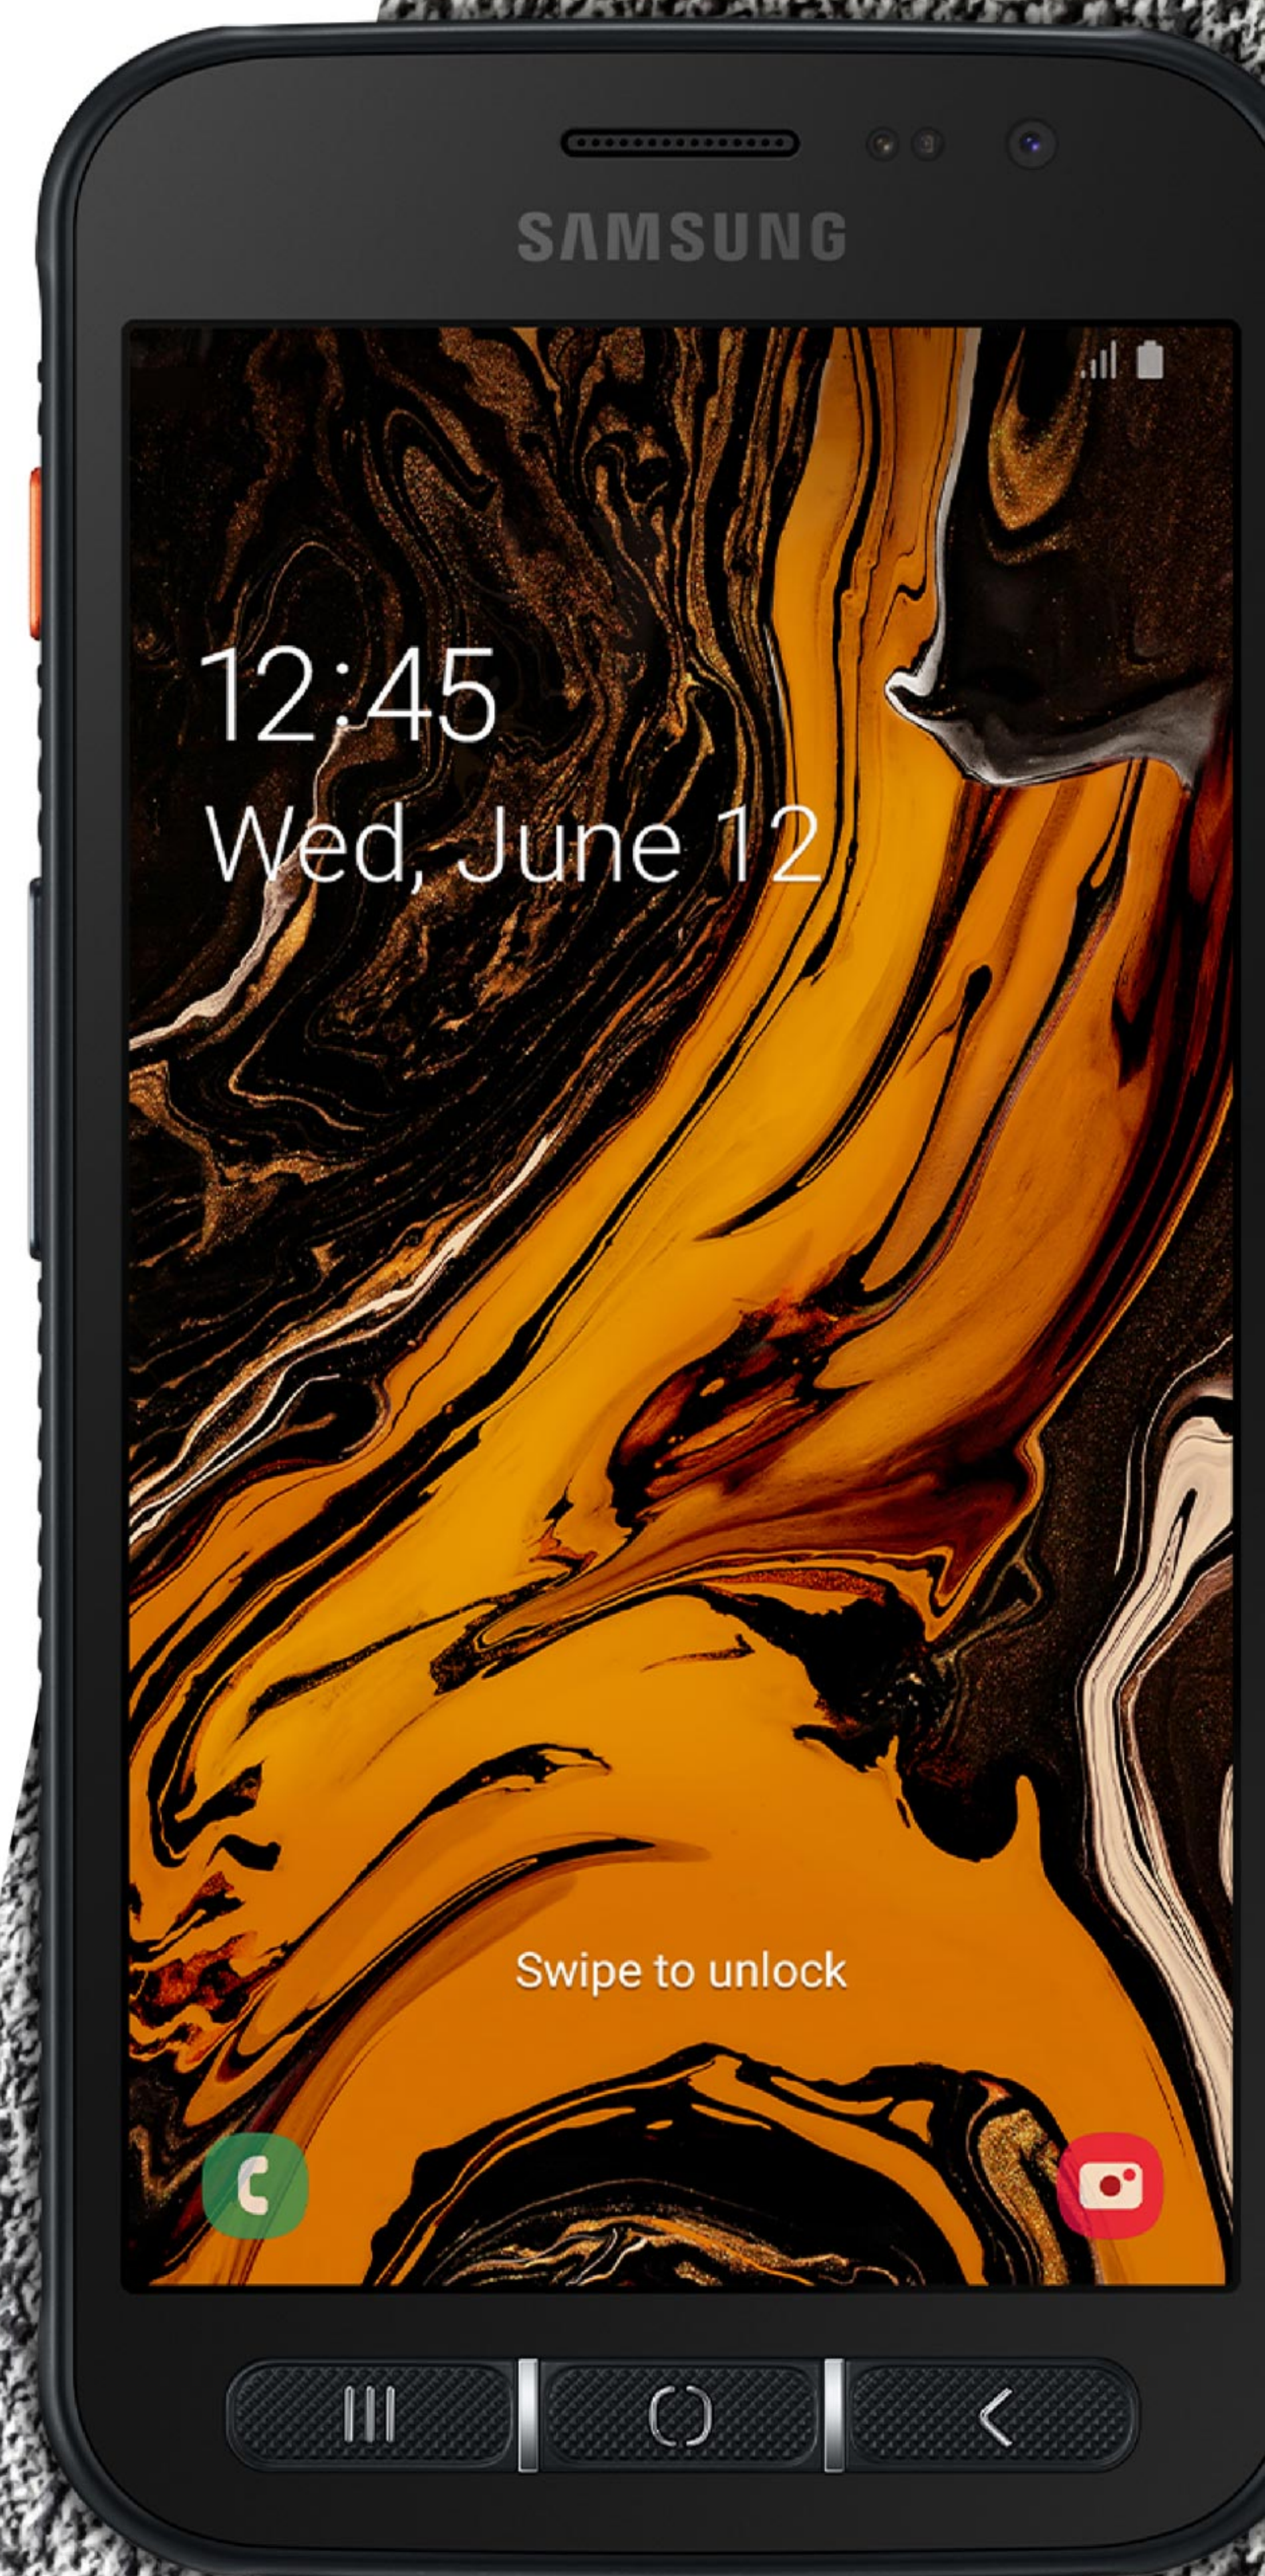

¹Resistant to dust and up to 1.5 metres of fresh water for up to 30 minutes (IP68)

MIL-STD 810G Certification.

The tough durability of the Samsung Galaxy XCover 4s means you can carry it confidently, unafraid of knocks and bumps. It has received US Military certification MIL-STD 810G for standing up to some of the toughest stress testing and extreme conditions—from high and low temperatures to vibrations, mechanical shock, ice and dust.

Replaceable battery.

Never worry about running out of power, even when you're in the field or in work environments with no access to a charging point. The large capacity, replaceable 2,800mAh battery in the Samsung Galaxy XCover 4s packs enough power to keep up with the busiest working day. And if you do run low, you can easily pop open the cover and swap out for a fully-charged battery (sold separately).
