HT Series 2.0

HT Series Features

Heavy duty locking accessory connector

HT Series 2.0 - a model for every application. From entry level to sophisticated MPT1327 trunked variants, the HT Series 2.0 is built without compromise to deliver loud and crisp audio using the latest compander noise reduction technology.

Submersible - conforming to European rating IP68, the HT Series 2.0 offers the highest submersibility rating of any two-way portable radio. Uniquely able to withstand total immersion in water to a depth of 5 metres for 1 hour, Entel's HT Series 2.0 radios are therefore extremely resistant to corrosion, more than a match for the likely hazards encountered in any field of operation.

Commercial Grade Construction - exceeding MIL STD 810C/D/E/F rating for tough enduring performance the HT Series 2.0 is designed to withstand shock, vibration, dust and moisture, ensuring many years of trouble free use in the most hostile environments.

Simple Or Sophisticated - you choose. Need simple speech communications? Then our entry level PMR radios will meet all your needs. Entel's mid level radios give you all the facilities you might expect from our competitors' products, while our top of the range radio is arguably the most versatile radio you can buy.

Intelligent Lithium-Ion Battery With Built-In Charge Cycle Monitoring - this very latest technology gives you four essential advantages:

- 1) For your convenience, the HT Series 2.0 will count the charge cycles of your battery pack, warning you when it is nearing the end of its life. Models equipped with an LCD screen will also display the battery charge count
- 2) Extended duty cycle
- 3) Not prone to the dreaded memory effect that Nicad and Ni-MH battery packs suffer from, therefore no need to fully discharge your battery pack before charging
- 4) Stores a charge up to three times longer than a Nicad battery

ATEX Approved IIC - The HT900 range of ATEX certified portables meets IIC T4, the most stringent ATEX ratings as required by the EU directive 94/9/EC. For full details, refer to the ATEX data sheet available here: www.entel.co.uk/atex.

ATEX Approved IIA - The HT800 range of ATEX certified portables meets IIA T4 with 4 watts RF power, for those users not restricted to the IIC 1 watt regulatory classification.

IECEx Approval - The HT500 range of intrinsically safe certified portables is suitable for those users who do not need to comply with the European ATEX standard.

| Frequency range VHF | 216 to 223 MHz |
| Frequency range UHF | 330 to 400 MHz |
| Frequency range UHF | 400 to 470 MHz |
| Frequency range UHF u/band | 450 to 520 MHz |
| Frequency range UHF | 800 to 870 MHz |
| Environmental protection | IP68 submersible 5m for 1 hour |
| Military Standard | MIL STD 810C/D/E/F |
| Dimensions* | 130mm(h) x 59.5mm(w) x 37mm(d) |
| Weight | 277g (with battery and antenna) |
| Audio output | 660mW - distortion: < 3% @ 500mW |

* Dimensions are based on radio with attached battery, excluding knobs, antenna and protrusions.

Supplied Accessories

7.4v 2000mAh Li-ion battery (except for ATEX models which have 1800mAh)

CSAHT rapid charger is included with HTxx2, HTxx2S and HTxx3

Spring loaded belt clip

High efficiency antenna

User guide CD
